UV/Visible/Heat/Activator Curable Low Shrink (Burnt-Off) Mask

PRODUCT DESCRIPTION

Incure Litemask™ 4153 is an easy-to-use UV/Visible Light/LED/heat-curing, low viscosity (burnt-off) mask for temporary protection from chemical cleaning. Resistant to many chemicals, it does not affect the masked surfaces before and after cure. Product contains a 100% solids urethane acrylate and does not contain VOCs. The use of 4153 temporary masks help increase productivity and reduce labour content in plating and coating processes in turbine blades maintenance for the aerospace and marine industries.

EtO and GAMMA STERILIZATION (Not Applicable for this Product)

All Incure medical products are formulated to subject to standard sterilization methods, such as EtO and Gamma Radiation of 25 to 50 kGrays (cumulative). Enhanced moisture and thermal resistance of this product show excellent adhesion and bonding strength after one cycle of steam auto-clave test. Depending on bond design and structure of the application, users should test specific assemblies after subjecting them to sterilisation. Consult Incure Support Team for assistance, if your devices are subjected to more than one sterilization cycles.
